Drive Axle	Front End Repair	
\$1,885	\$1,126	

Cars have problems.

Everyone has insurance on their vehicles to protect them in the event of an accident. However, many people who have collision insurance never use it. On the other hand, nearly every vehicle will require repairs due to mechanical failure. An average engine costs **\$9,186** to repair and the average transmission costs **\$4,888**. While these represent the major components, minor parts can still cost anywhere from **\$300** to **\$3,000**.

The question you need to ask is simple: **do you want to pay for these huge repair costs or would you rather someone else pay it for you?** With a CPOC vehicle protection plan, we pay the costs so you don't have to. In many situations, the cost of a single covered repair pays for the entire protection plan!

A mechanical breakdown can be very stressful, not only costing you money, but time. This is why **all our protection plans come with emergency roadside assistance, first day rental car benefits, and travel interruption coverage included at no extra cost.**

With a CPO Canada protection plan, you have someone to call if you are ever stranded by a breakdown. We will put you in a rental car and most importantly, cover the cost of your repairs to get you back on the road. We provide you peace of mind, knowing your vehicle is covered by an experienced company, focused on giving you with the best customer service in the industry.

All of our plans are accepted at nearly any dealership or repair facility throughout Canada.
